

MINASales

Internationale Vertriebsberatung
und Handelsvertretung

About us

Our clients develop and produce applications of microtechnology and nanotechnology for the industry of capital goods. We offer wide-ranging competence in developing distribution strategies and in successful implementations of your aim for target income.

Our services include the complete module set from analysing the situation to accomplishing the concept by means of active distribution.

In addition to this, we provide our tool set with different services of marketing.

This way, your messages will reach the market ahead of schedule!

Fields of work

We work in the following scopes:

- Coating technology (Galvanization)
- Technology of surface measuring
- Components for processing facilities
- Digital signal processing

Our partners

Beiersdorff GmbH
Frings Medienservice
SchauPlatz Nano
Zurich Instruments
SemiSol Analytik GmbH

We bet on high technology in the field of microtechnology and nanotechnology.

Target groups

User and provider from science and industry who make use of metrology or processing facilities focussing micro-/nanotechnology and surface technology.

Products

For clients in science and industry, there are applications in the field of microtechnology and nanotechnology focussing:

- Material science
- Tribology
- Biotechnology
- Surface technology
- Chemistry

Technology operator

The target group called technology operators are research facilities and industrial enterprises which work in the field of microtechnology and nanotechnology.

The operators in science, like universities, research institutes and industrial laboratories, develop technologies with products of Minasales in the field of basic research and for their customers.

The customers of technology operators belong to the field of industry.

Technology products Manufacturer

- Equipment manufacturers
- Manufacturer of components
- Metrology
